# AUVENIR

5.3 Release Notes

## **Auvenir 5.3 Release Notes**

We're pleased to bring you the latest release of the Auvenir platform. Read on to learn more about the exciting additions in our latest release 5.3.

#### What's in This Release:

- New copy engagement feature
- New non-digitized working papers uploaded into your engagements
- ✓ New enhancements to PBC manager
- New enhancements to Auvenir analytics tool
- Auvenir launches new content guide for the US market

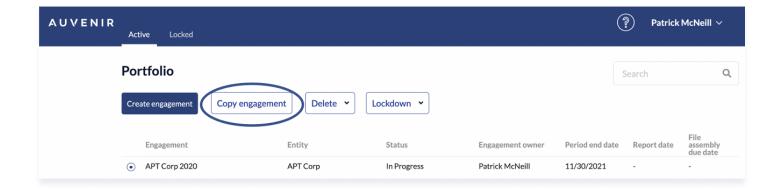

## Copy engagements feature

## The Skinny:

This powerful feature allows you to copy an engagement from your portfolio list to reuse large portions of the content in other engagements to save you time.

#### **Features:**

Do you have multiple clients in a specific industry? Copy a recently completed engagement and create an industry template. Reuse industry analysis and other common elements to get a head start on your next engagement for that industry.

# Include Non-digitized working papers within your engagements

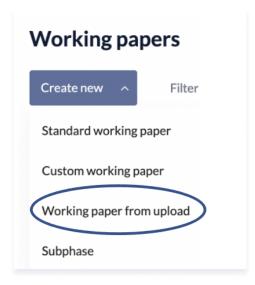

## The Skinny:

You can now include working papers from Microsoft tools such as Word, Excel, and PPT directly within your Auvenir engagements. We call these non-digitized working papers because they have not been through our proprietary digitization process.

#### **Features:**

Do you have a process that is already mapped out within a Microsoft tool such as Word, Excel, or PPT? Easily upload it directly into your engagement file to save time and effort. Edit those documents inside Auvenir with our built-in SharePoint connection.

There are some restrictions on the use of these working papers, such as the ability to use Auvenir common tools. Refer to the guide document for more details.

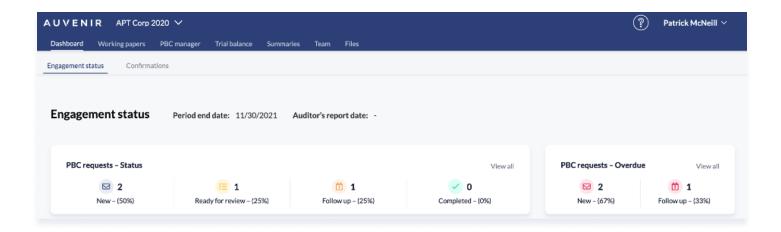

# **PBC Manager enhancements**

### The Skinny:

Auvenir has added a batch import feature as well as a consolidated daily notifications email to both auditor and client and added a PBC request status to your engagement dashboard.

#### **Features:**

- Download our convenient PBC request template, fill it in, and upload it to send a standard list of data requests to clients.
- During the progress of your engagement email notifications of new, updated, or overdue data requests will be sent once per day to team members and clients to keep things on track and ensure you have the data you need to complete your analysis.
- Email notifications are only sent when new or updated requests have been added. All requests are consolidated into a single email to manage the number of client notifications.
- Data request and status view have also been added to your engagement dashboard for easy review and updates.

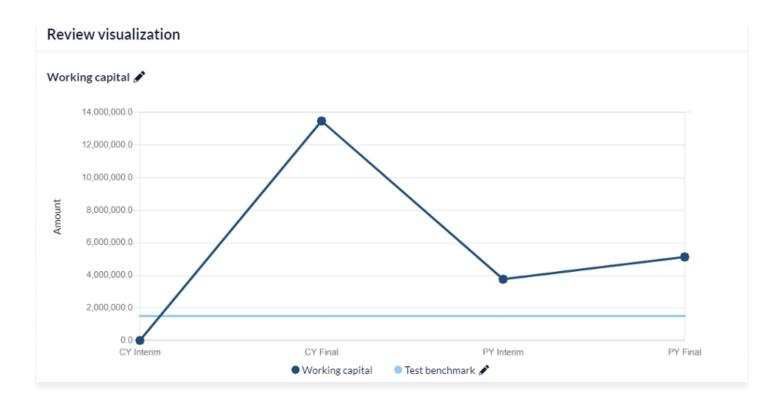

# Auvenir enhances its analytics common tool

## The Skinny:

Add analytics directly within your working papers. We've started with ratio analysis, but we're far from done!

#### **Features:**

- Create analytics from your trial balance data to add powerful visualizations directly incontext anywhere inside your engagement working papers.
- Add as many as 2 current and 20 historical trial balances to your engagement file to provide a trend analysis of up to eleven years.
- Add industry benchmarks to further enhance your analysis.

# Auvenir enters the US market with comprehensive US Content Guide

## The Skinny:

US users can now join the Auvenir platform with our new US Content Guide - https://na.auvenir.com/assets/legal/auvenir-and-us-content-authors. The system contains built-in tailoring questions to ensure you get only the content you need to fit the size and requirements of your engagement.

#### **Features:**

- Your Auvenir Pro subscription combined with the US Content Guide contains four custom workflows including a Guided Audit Workflow, Guided Review Workflow, Guided Compilation Workflow, and a Guided Preparation Workflow.
- The US Content Guide, authored by Dr. Mark S. Beasley and Dr. Randy Elder, is based on the Audit and Attest and Compilation and Review Standards published by the AICPA.
- Auvenir integrates tailored questions directly in the platform to ensure you get the right content for your engagement, the moment you need it.
- All templates are fully customizable, designed to give you full control to tailor engagements to your clients' needs.
